WORK EXPERIENCE

SOFTWARE ENGINEER, SkyWalk Global, India

January 2023 - June 2024

- Engineered dynamic full-stack web applications using MongoDB, Express.js, React, Node.js etc with robust CRUD operations and seamless API integration.
- Led the design and integration of RESTful APIs and third-party services using MuleSoft, ensuring secure, efficient data handling and enhancing application performance.
- Demonstrated expertise in front-end technologies, including HTML, CSS, JavaScript, Bootstrap etc creating responsive, user-friendly interfaces.
- Proficient in leveraging Azure cloud services for API deployment, cloud storage, and CI/CD pipelines, ensuring high availability and scalability.

FULL STACK DEVELOPER INTERN, Kompetenzen Technologies, India July 2022 - December 2022

- Developed and optimized web applications, contributing to a 15% improvement in system performance using Java, JavaScript and SQL.
- Contributed to integration projects, collaborating with engineering teams to implement efficient solutions.
- Conducted thorough code reviews and implemented improvements, enhancing overall application performance.

PROJECTS

YELPCAMP

A full-stack web application for users to browse, create, and review campgrounds.

- Developed RESTful routes for CRUD operations on campgrounds, user reviews, image uploads, mapping etc.
- Implemented authentication and authorization using Passport.js to manage user sessions.
- Integrated file upload functionality using Multer and Cloudinary to allow users to upload images of campgrounds.
- Designed the front-end with EJS templates and Bootstrap to provide a responsive user interface.
- Deployed the application with a connected MongoDB Atlas database.
- Added features such as user reviews, flash messages, and input validation for better user experience.

REAL ESTATE MARKET PLACE

A full-stack real estate application.

- Developed a feature-rich real estate platform from scratch using the MERN stack.
- Implemented advanced authentication with JWT for secure user access, including email/password login and Google OAuth integration.
- Enabled users to perform CRUD operations on property listings, including uploading and managing images via Firebase Storage.
- Designed advanced search functionality with filters and sorting options, optimizing MongoDB queries for better performance.
- Built user profile management features with secure account deletion and profile image uploads.

SKILLS

- Front-End : HTML, CSS, Bootstrap, JavaScript, React
- Back -End : .NET, Java, Nodejs, Expressjs
- Integration: MuleSoft Anypoint Platform, RESTful APIs, SOAP services
- Databases: MySQL, MongoDB
- Version Control: Git, Azure DevOps
- AI: ChatGPT, Copilot

EDUCATION

Bachelor of Technology
Electronics and Communication Engineering
Kerala Technological University

CERTIFICATION

MuleSoft Certified API Developer
Salesforce
